EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

2. This application is in condition for allowance except for the presence of claims 4-8, 11, 12 and 18-20 directed to Group II which was non-elected without traverse. Accordingly, claims 4-8, 11, 12 and 18-20 have been cancelled.

3. The following is an examiner's statement of reasons for allowance: The claimed invention requires the use of specific organic solvents in the mixed solution with the nucleic acids, where the organic solvents are clearly added prior to the adsorption step and are present during the adsorption step. For example, claim 1 requires the use of diethylene glycol dimethyl ether and the other independent claims require specific solvents from the list as in claim 10. The cited prior art references of Henco and Colpan do not use the teach or suggest the use of the specific organic solvents claimed. Further, no prior art was found in which the specific organic solvents claimed were present during the adsorption step. Therefore, the claimed invention is novel and unobvious over the prior art.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
